DIGRAIN

Insecticide Concentrates

The Digrain brand is synonymous with a high quality product at a fair price. Only formulations that excel in testing will be registered and launched. One of the leading brands in the UK pest control market, has been extended with two new exciting additions.

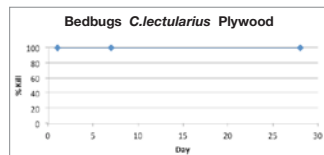

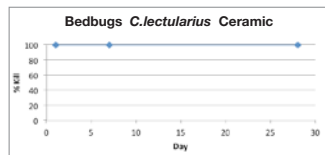

Digrain C40 WP

40% Cypermethrin as a wettable powder (400g per kg)

New and highly effective wettable powder with proven long term residual activity. For use against flying and crawling insects in and around domestic and industrial establishments, hospitals, military areas, slaughter houses, refuse tips, dustbins etc. For use on furnishings, hard horizontal and vertical surfaces where pests may rest. Each 10g sachet dilutes in 5 litres of water for routine treatments of flying and crawling insects. Proven 100% long term mortality on insects such as bedbugs / cockroaches. Supplied in easy to use sachets – pack contains 50% more applications against other comparable products.

Our exclusive 2g sachets dilute in 1 litre of water for convenience with smaller doses.

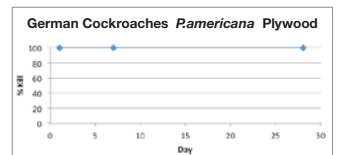

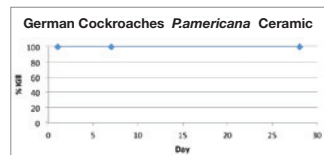

HSE: 10402

In conclusion, this report finds that Digrain C40 WP when applied at standard label rates onto ceramic and wooden tiles being kept at ambient environmental conditions, is effective in controlling Cimex lectularius for up to **28 days with a mortality of 100%**.

- ▶ 40% Cypermethrin - Highly effective wettable powder with long term residual activity
- ▶ Proven 100% long term mortality on bedbugs and cockroaches
- ▶ 50% more applications vs other comparable products
- ▶ Available in: 500g container, 15 x 10g sachets and 20 x 2g sachets for 1L dilution

Code	Description	Price
DC402	Pot containing 20 x 2g soluble sachets	£26.25
DC40SACHETS	15 x 10g sachets	£57.95 per pack
DC40500G	500g container	£143.49

In conclusion, this report finds that Digrain C40 WP when applied at standard label rates onto ceramic and wooden tiles being kept at ambient environmental conditions, is effective in controlling Periplaneta americana for up to **28 days with a mortality of 100% and a knockdown of 100%**.

Digrain Force EW

14.5% Cypermethrin, 4.5% Tetramethrin, 19.3% Piperonyl Butoxide

A high strength EW concentrate combining actives to ensure fast and effective control with long term residual. A great all round product packed with a high level of active ingredient for the successful control of flying and crawling insects on surfaces where insects may rest.

Dilution 25ml to 5 litres.

HSE: 10407

Code	DFORCE
Description	250ml dosing bottle
Price	£41.94

Cyperbio 100EW

9.86% Cypermethrin

A highly effective broad spectrum, water based insecticide with long term residual activity. An insecticidal surface spray for use in public health, food storage practice, waste and sites. Available at a very competitive price.

Dilution: 25ml to 4 litres water

HSE: 7507

Code	I3173
Description	1 Litre dosing bottle
Price	£42.64

NEW

Digrain Bugster EC

Prallethrin 2% w/w, Cypermethrin 10% w/w

Digrain Bugster is a brand new all-purpose professional-use insecticide by Lodi UK. Designed for use when both hot or cold fogging and as a surface spray, it's an effective control method against flying and crawling insects including moths, wasps, fleas and cockroaches. Bugster contains a generous 2% of Lodi's much-loved prallethrin active offering a fast knockdown with great results in minutes. Coupled with cypermethrin, a trusted residual, Bugster is a general-purpose insecticide that every pest controller should have in his armoury. Digrain Bugster can go where many other products can't, including hospitals and kitchens, as well as domestic and commercial properties, hotels, restaurants, ships, and more.

- **2% prallethrin active offering a fast knockdown with great results in minutes**
- **Combined with cypermethrin for a trusted long-term residual**
- **Designed for use when both hot or cold fogging and as a surface spray**
- **Suitable for spraying and ULV cold & thermal hot fogging**
- **Fast knockdown**
- **8 to 12-week residual**
- **All-purpose insecticide treatment**

Phobi Dose+

**9.89% Imiprothrin & 14.5982% Cyphenothrin,
0.10% Natural Pyrethrum**

Phobi Dose is an innovative and highly effective liquid concentrate formulation containing the active ingredients Imiprothrin and Cyphenothrin.

The active ingredients in Phobi Dose are unique to the UK market in a liquid formulation and offer the pest controller a highly effective form of pest control. As these actives have not been used by the UK pest controller there is a much smaller chance of resistance and a far greater chance of success.

The Imiprothrin active has a phenomenally fast knock down effect proven in the field and laboratory trials. The combination with Cyphenothrin gives Phobi Dose an all-round knock down and residual of up to 3 months on non-porous surfaces.

HSE: 10687

Phobi Flash Dose

2.175% Pyrethrins

A new addition to the Phobi range! Phobi Flash Dose is a concentrate based on natural pyrethrum synergised with PBO. Highly effective on flying and crawling insects used in a number of indoor situations including the food industry. Phobi Flash can be applied either as a coarse spray or through a fogger.

HSE: 8454

Code	Description	Price
I4207	250ml dosing bottle - concentrate	£116.44

Code	Description	Price
IF4217	500ml dosing bottle	£45.92

Phobi CAPS

Cypermethrin 9.2%, Prallethrin 0.46%

A new UK Prallethrin active adding to the Phobi range!

- Fast knockdown and residual
- Odourless and non-staining
- Active on porous and non-porous surfaces
- Microencapsulation ensures long-term stability of the active against light, temperature and humidity
- Different sized capsules within the active allows for regular and continuous release

Phobi Caps is a micro-capsulated insecticide used against crawling & flying insects such as cockroaches, bed bugs, ants, flies and mosquitoes. Prallethrin gives the product a shock effect while the microencapsulation of Cypermethrin ensures the stability to light, temperature and humidity. Thanks to the different sizes of capsules, the release of cypermethrin is regular and continuous.

HSE: 10658

Code	Description	Price
I7126	500ml dosing bottle - concentrate	£60.18

Phobi Dose RTU+

Cyphenothrin 0.06% w/w, Imiprothrin 0.04% w/w, 0.01% Natural Pyrethrum

- Can be used on soft and hard furnishings including mattresses and bedding

Phobi Dose is an innovative and highly effective formulation containing the active ingredients Imiprothrin and Cyphenothrin. The Imiprothrin active has a phenomenally fast knockdown effect proven in the field and laboratory trials. The combination with Cyphenothrin gives Phobi Dose an all-round knockdown and residual of up to 3 months on non-porous surfaces.

Phobi Dose RTU in a 5 litre canister has the ability to be used on soft and hard furnishings including mattresses and bedding. Phobi Dose RTU can also be used on houseflies, mosquitoes, cockroaches, fleas, ticks, and moths.

HSE: 10688

Code	Description	Price
I5249	5 litre canister - RTU	£43.62

Phobi Larvox

6.10% S-methoprene

Phobi Larvox is an innovative and highly effective Insect Growth Regulator for the control of bedbugs, moths and stored product pests. Phobi Larvox is a unique formulation containing the active S-methoprene which targets the eggs and larvae of insects.

S-methoprene acts by mimicking the natural juvenile hormone that must be absent for a pupa to moult to an adult. This in turn prevents the insect reaching maturity so they are unable to reproduce causing a decrease and ultimately death of an insect population.

HSE: 10014

Code	Description	Price
I7127	500ml dosing bottle	£86.10

Phobi F&F+ One Shot

0.11% Imiprothrin, 0.33% Cyphenothrin and 0.01% Natural Pyrethrum

The Phobi F&F+ One Shot fogging device is formulated with the proven combination of actives used in the Phobi range (Imiprothrin & Cyphenothrin). Faster and more effective than any other comparable product on the market.

- 100% mortality of flying insects in 3 minutes
- 100% mortality of German cockroaches in 5 minutes

The increased strength and speed of control and large application area of 375m³ makes it an essential product in any pest controller's armoury.

For use in all indoor situations against flying and crawling insects - simply press and twist the nozzle to release and all pests will be controlled in minutes.

HSE: 10680

Code	Description	Price
I4206	300ml One Shot aerosol	£10.84

READY-TO-USE

Oil-based Insecticide

The strongest oil based ready to use insecticide available to UK pest control.

Perbio Choc RTU

0.64% Permethrin, 0.63% Tetramethrin

Perbio Choc RTU contains 0.64% Permethrin and 0.63% Tetramethrin for a quick knockdown and long term residual. Since its launch over 8 years ago it is one of the most popular ready to use insecticides available. Pest controllers are guaranteed speedy control that will please you and your customer.

The residual can last for up to 3 months ensuring the treated area remains pest-free for a long length of time. For use against flying and crawling insects including ants, cockroaches, fleas, flies, wasps, mosquitoes, stored product moths, red mites, fruit flies, bedbugs by application to surfaces, hard and soft furnishings, cracks and crevices.

For use in commercial, industrial premises including kitchens, hospitals, military, food handling / processing / storage / preparation areas. In and around farm buildings, dairies, animal housing plus amenity areas, in sewage works, refuse disposal and waste storage areas including refuse tips and landfill sites.

- Can either be sprayed or fogged
- Surface spray – 50ml product to 6.25 square metres
- Space treatment – 0.4ml product to 1 cubic metre (5L treats 12,500 cubic metres)

Addict Cockroach Gel

NEW ACTIVE / NEW GENERATION!

2% Dinotefuran

A bold new product with a new active ingredient coupled with an alluring formulation for fast acceptance by both gel-averse and non-gel averse cockroaches.

Formulated with Dinotefuran – a leading active in US cockroach control that acts on both contact and ingestion! Highly effective on all cockroach species quickly establishing control of the adults, nymphs and nests.

Independent test data highlights the speed of control with over 50% killed within 14 minutes and 100% in less than an hour. This is up to 23 times faster than other comparable products.

- **100% Cockroach mortality in less than 1 hour**
- **Brand new active substance to Europe with no known resistance**
- **Dinotefuran – leading cockroach active in the US**
- **New UK formulation**

BPR: UK-2017-1064

Code	Description	Price
18080	Box of 4 x 30g tubes	£28.91 per tube

Imidasect Cockroach Gel

2.15% Imidacloprid

Imidasect cockroach gel is specifically formulated to attract and control various species of cockroaches. Imidasect contains the proven Imidacloprid active which allows the cockroach to return to the nest transferring the bait to other cockroaches and the queen resulting in the death of the entire colony.

HSE: 9694

Code	Description	Price
IMID02	35g Tube	£20.10 per tube

Imidasect Ant Gel

0.01% Imidacloprid

A highly effective formulation to attract and control Pharaoh ants, Argentine ants and black ants. Foraging ants will feed on the bait and then return to the nest, transferring the bait to the queen and the entire colony. Visible signs of the bait working should be seen within a few days of application. Apply bait in drops of about 1cm in diameter or in lines of about 7cm where ants are known to be foraging.

ORGAN-X PRO

100% Natural Insecticides

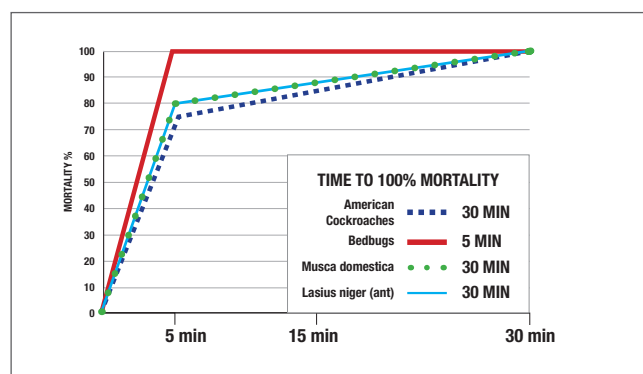

Our Organ-X range has expanded with the addition of **Organ-X PRO** products!

A 100% Natural range of products extensively tested and proven to control insects within minutes. The all new Organ-X PRO range is the culmination of over two years' research, with over 80 formulations developed, tested and rejected to leave the final Organ-X PRO as the stand out formula for natural insect control. Once Organ-X PRO is sprayed, the target insect is disabled almost instantly, and death occurs within minutes.

When paired with our Desi-DUST Entrapment Powder living conditions are uninhabitable for insects!

- ▶ **Proven control of insects within minutes**
- ▶ **100% Natural physical action insecticide**
- ▶ **Odourless and non-staining**

Efficacy Data: Test on Organ-X Pro natural insect control solution, under laboratory conditions. Actual use may vary.

Organ-X Pro RTU

A new unique pesticide free insect spray with proven 100% efficacy. Two years of development and testing have resulted in a pesticide free spray that disables and controls insects fast and effectively. A direct spray onto the target organism will ensure fast control proven in field and laboratory tests. Based on a natural-origin polymer, Organ-X Pro Insect Killer is a unique formulation that creates a coating and acts by physical contact on the target insect.

Code	I3286
Description	500ml RTU
Price	£9.35

Organ-X Pro Concentrate

Organ-X Pro Concentrate is a 100% natural insect control solution made from natural polymers. It is pesticide-free and functions solely by physical means and is effective in controlling most types of common flying & crawling insects such as bedbugs, ants, cockroaches, flies, fleas and stored product insects.

Dilute at 1 part concentrate to 9 parts water. Knock down by physical action with proven 100% efficacy. Perfect to use in instances where biocides are regulated or prohibited.

Code	I3287
Description	500ml Concentrate
Price	£19.58

Organ-X Pro Freeze Spray

Lightning elimination solution for crawling and flying insects! Neutralizes and instantly kills insects. Chemical free, odourless and non-staining, this freeze spray is effective on cockroaches, spiders, ants, fleas, bedbugs, silverfish and against flies, mosquitoes, wasps, hornets, wasp nests etc. The pests are not poisoned, but simply frosted. Due to the sudden cold, the cells of insects, larvae or eggs burst and the pest dies immediately.

Code	I7518
Description	500ml Can
Price	£7.84

ORGAN-X

100% Natural Insecticides

Organ-X Desi-DUST

Desi-DUST is a naturally-mined, mineral product made up of fossilized remains of diatoms. When crushed to a fine powder it feels similar to chalk powder to the touch, but when viewed under a microscope the fine particles resemble shards of broken glass! Highly effective when applied to areas where insects harbour.

Diatomaceous earth is a highly effective powder against insects. It absorbs the oily protective layer that covers their exoskeletons and without this protective coating, insects such as bedbugs and ants will dehydrate.

Also available in a 450g, perfect for resale to the end consumer.

Code	Description	Price
ORGAN-X-P	450g container	£4.85
DESIDUST2	2kg bucket	£11.24

Organ-XP Smoke Bomb Jumbo

13.35% Permethrin
(25:75 cis:trans isomeric ratio)

Organ-X Smoke Bomb Jumbo has been formulated to control all crawling and flying insects in areas of up to 3000m³. A very easy to use and highly effective device that will clear all types of insects from livestock and poultry housing, feed bins, food handling areas, storage areas, food preparation areas, public buildings, waste sites and empty greenhouses. Simply light the non-sparking wick, smoke fumes will work their way into all nooks and crannies targeting the most difficult areas to control insects. Not to be used whilst the animals are present.

HSE: 9963

Code	Description	Price
ORGANXJ	93g	£20.42

Organ-X Fox & Animal Deterrent

88% w/w Aluminium Ammonium Sulphate

- Mix 50g In 9L of spray solution
- Treats 34sqm
- Humane control
- Garden & patio protection

Curb Garden Powder reduces damage in the garden caused by birds, rabbits and hares. Deters fouling by dogs, cats and foxes. It works by confusing the animal/birds sense of taste and smell. For optimum effectiveness application should be made as soon as the problem is observed. The product is not rainfast and reapplication may be necessary for extended activity.

AGRICULTURE

Insect Control

**KILLS
MAGGOTS**

Granular Larvicide, 2% Cyromazine

Maggots is a highly efficient larvicide that attacks the maggot and stops it developing into a fly. Formulated with the growth regulator cyromazine it is very easy to use and can either be sprinkled on slurry or sprayed after dilution in water. Maggots is the only effective way of stopping fly problems and the results can be seen on the adult fly population in approximately 2 weeks after first application.

Fly larvae feed in the top four inches (100mm) of muck and it is important that the product is applied in four inch (100mm) layers.

Maggots targets 80% of a fly's life cycle. This ensures that the problem is tackled at source as prevention is better than a cure. With up to 7,000 maggots in 1kg of muck fly problems can occur very quickly. Flies are responsible for a number of diseases in your livestock or poultry house including Salmonella and Brachyspira which can dramatically reduce production levels or in the worst cases shut down your farm.

Application	Dose Rate	Treated Area
Dry scattering	500g	20m ²
Spraying (directly onto muck)	500g / 5L of water	20m ²
Spraying (indirectly – through slatted floor units)	500g / 15L of water	20m ²

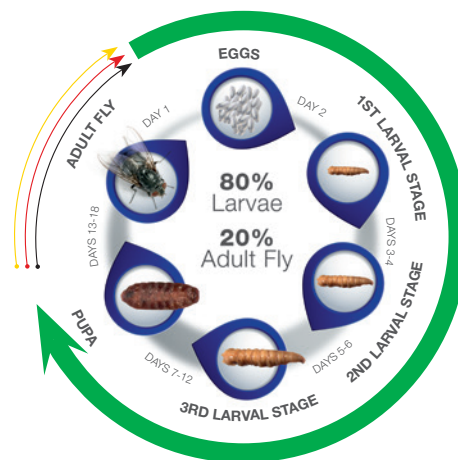

Maggots

Maggots is a fly larvicial product which is specially formulated to eliminate and control nuisance fly larvae. The product is primarily used in:

- Poultry Houses
- Dairy and Calf Units
- Pig Fattening and Pig Breeding Units
- Sheep and Goat Units
- Horse Stables
- Waste Management Sites

**MAGGOTS
ATTACKS
80%
OF A FLIES
LIFECYCLE**

Maggots will help to reduce liquefaction of manure, leading to easier removal of muck which will ultimately save time and money and produce better manure quality. The product is proven to reduce ammonia and help to reduce odour (therefore reduces ventilation costs). A decrease in fly population is proven to increase productivity in animal housing.

HSE: 9553

Code	Product	Price
MG20	Maggots 20kg sack	£183.57
MG10	Maggots 10kg bucket	£104.03

Larvenol Larvicide

0.4% S-Methopren

Larvenol is a brand new insect growth regulator for use in poultry and livestock housing containing S-Methoprene. Larvenol is applied as a granule directly onto the muck or areas where flies and maggots are breeding (ie mortality bins). Larvenol will ensure that the larvae can't develop into adult flies and will control an infestation before it starts.

Code	IFLY
Description	1kg bucket
Price	£107.36

Sheila Ready To Use Granular Fly Bait

1% Azamethiphos

Sheila Fly Bait is based around the highly successful active ingredient – azamethiphos unique to LODI UK. Sheila Fly Bait is a ready to use granule which is formulated with the same attractants and sex pheromones found in Twenty One. Simply scatter Sheila onto trays and place on surfaces / muck, where flies congregate. Sheila RB1 will attract flies that will die almost instantly after ingestion. Results will be seen very quickly with many dead flies next to the Fly bait. Priced very competitively to target the pyrethroid knockdown sprays which are proving ineffective with issues around resistance.

BIOSECURITY & DISINFECTANTS

STERI-7 XTRA can be used wherever the highest standards of disinfection is required and are suitable for use in healthcare and food processing environments and all other workplaces where there is a risk of cross contamination. The product has been tested against and is effective against a number of commonly occurring bacteria, yeast and viruses that are known to be highly transmissible and can result in infections and illnesses.

NEW

STERI-7 XTRA 5 Litre Concentrate

- 5L Concentrate
- Reactive Barrier Technology protection between cleans
- Tested and proven efficacy against Feline Coronavirus
- High level disinfectant cleaner
- Non-corrosive
- Non-residual organoleptic effect on food

- Low toxicity
- Effective in soft or hard water
- No reported resistance
- Triple active reducing need to rotate products
- Maintains efficacy in heavy organic soiling, blood and proteins

STERI-7 XTRA Concentrate is formulated to be diluted and dispensed for high volume cleaning solutions. STERI-7 XTRA Concentrate is low-foaming which makes it ideal in cleaning and scrubbing machines. This also represents the most economical way to purchase as it can be diluted up to 1:50.

Jade Cluster Grain

0.005% Bromadiolone

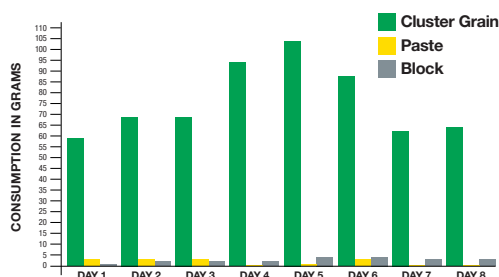

A new unique formulation that combines the advantages of all the current day baits into one innovative solution. The smoothness of the paste coupled with the crunch of the various cereals, provides rodents with an extremely palatable bait to help control infestations quickly.

This particular field test took place on a farm over 8 days. Each bait station contained a cluster grain bar / a sachet of paste and block. The bait stations were checked every day and the bait consumption noted.

- **Extremely palatable, irresistible formulation**
- **Easy to eat shaped bars**
- **Ideal for dry and damp conditions**
- **Packed with sesame, millet and much much more!**
- **Packed in individual sachets with a transparent strip so that you don't come into contact with the bait**

MOUSE KILLER

Black Pearl Paste and Grain are highly attractive baits containing micro-encapsulated Alphachloralose. Formulated to control mice infestations within 24-48 hours.

The Alphachloralose active belongs to the narcotic family. Only a small amount needs to be consumed by a mouse and the active will start to take effect by reducing the body temperature of the mouse until it falls into a coma and dies. In a lot of cases this can take as little as a few minutes.

There is very little danger of any secondary toxicity issues with Alphachloralose as residues in dead mice are negligible and won't affect any predators that might prey on a mice controlled by Black Pearl.

Paste

4.00% Alphachloralose

A unique and highly attractive bait formulated from a blend of premium grade cereals, mulched and mixed together to give superior performance.

K-Obiol EC25

For control of all grain insects within storage silos and barns.

K-Obiol® EC 25 is an emulsifiable concentrate based on the pyrethroid, deltamethrin. The formulation contains 25g/L of deltamethrin synergised with 225g/L of piperonyl butoxide for the control of all stored product insects known to infest grain and pulses.

MAPP: 13573

- For control of all grain insects within storage silos and barns
- For fabric of the building treatment

Code	K-OBIOL
Description	1 Litre bottle
Price	£71.74

K-OBIOL

Stored Grain Protection

LODI UK are the only company in the UK to offer you the full K-Obiol grain protection package. K-Obiol EC targets grain store insects in the fabric of your store and K-Obiol ULV targets insects in grain by treating the grain directly.

Proven protection for UP TO 12 MONTHS!

Unique to the UK and exclusively available from Lodi UK! An innovative formulation which is applied directly to the grain giving it continual protection for up to 12 months.

- New Ultra Low Volume (ULV) Pyrethroid Formulation containing Deltamethrin and Piperonyl Butoxide
- Ready to use
- No withholding period after treatment
- Up to 12 months control on grain and residues are removed in processing (Beer and Bread)

K-Obiol ULV6

Pyrethroid Formulation

K-Obiol® ULV6 is a modern pyrethroid formulation containing Deltamethrin, synergised with piperonyl butoxide for the control of all stored product insects known to infest grain and pulses. This Pyrethroid formulation is an ideal alternative to organo-phosphorus formulations.

Ready to Use

K-Obiol® ULV6 is ready to use liquid grain protectant for the control of stored product pests including crawling insects such as grain weevils, flour beetles, grain borers, saw-toothed grain beetles and bean weevils and flying insects such as rice moths, indian meal moths and grain moths for up to 12 months.

The pack connects directly to application machinery so there is no measuring or pouring required. The system reduces the risk of application errors, has no concentrate to expose operators to & allows load rates to be maintained.

K-Obiol contains

Deltamethrin 6gms/litre. Piperonyl butoxide 54gms/litre. K-Obiol is accepted for use by the Brewing Research International (BRI) and the National Association of British and Irish Millers (NABIM)

Application Rate

4.2L of K-Obiol® ULV6 for 100 tonnes of grain for 12 months protection.

The Application rate of 42ml per tonne (or 42mg/kg) means the MRL is not breached and is 8 times less than accepted limits.

The manufacturing process of brewing and baking removes the residues of Deltamethrin therefore Deltamethrin is not detected in the finished product.

Specialist Ultra Low Volume (ULV) application equipment is required.

MAPP: 13572

PHOBI SMOKES

For Empty Grain Stores

NEW

Phobi Smoke Pro 90C+

7.0% Cypermethrin

Control of stored grain pests.

The new Phobi Smoke Pro 90C+ is a highly effective acaricide / insecticide for use in empty grain stores. Phobi smoke has proven 100% efficacy in the control of Grain Beetles / Grain weevils and Grain mites. Simply light the wick of the smoke and place in the empty grain store and the smoke will reach into all the nooks and crannies where the insects hide.

- 100% Efficacy
- Active ingredient – Cypermethrin
- 100g smoke

HSE: 10615

Code	Description	Price
G3053	Phobi Smoke PRO 90C+	£26.25

Phobi OPP Fungicidal Smoke

30.00% 2-phenylphenol

The new and unique Phobi OPP is a fungicidal, bacterial and virucidal disinfectant smoke containing OrthoPhenylPhenol with proven minimum 99.9% control.

Moulds growing in grain stores and on the grain are one of the great concerns for farmers and grain store facilities. Moulds can produce some of the most poisonous food-borne mycotoxins whose effects are acute with symptoms of severe illness appearing quickly after consumption of food products contaminated with mycotoxins. Other mycotoxins occurring in food have been linked to long-term effects on health.

Phobi OPP has the advantage as a smoke to reach into all the cracks and crevices of the store and control at least 99.9% of all moulds and forms an integral part of any Pre-Harvest disinfection program.

- Eradicates minimum 99.9% of fungus and moulds
- Easy to use
- Integral part of a Pre-Harvest disinfection and pest control program for grain stores
- 250g smoke treats up to 450 cubic metres

Code	Description	Price
G4010	Phobi OPP Fungicidal Smoke	£26.25

BYEBIRDS

Bird Control

Natural and innovative solution for bird control problems.

ByeBirds® is a natural and innovative solution for bird control problems and is the most popular and effective system on the market.

Based on herbs that naturally deters birds through smell, touch and taste without harming them. It is 100% natural and does not contain chemicals or volatile compounds.

The paste-type material temporarily sticks to bird's feather disturbing its flight. The slippery consistency makes landings difficult and unbalanced for the birds.

It produces a spicy sensation to the taste and an itchy feeling on the legs and eyes disturbing their visibility and sense of orientation, as well as intimidation by feeling surrounded by something unpleasant.

ByeBirds targets bird's psychological, behaviouristic and nesting patterns making them modify their habits, preventing birds from nesting and perching on the places it has been placed.

Paste Bait

It is effective against all types of birds, especially the small and medium-sized pigeons, sparrows, seagulls, starlings and crows.

ByeBirds is ideal for public and commercial buildings, historical monuments, warehouses, production sites, churches, solar farms billboards, stations, airports and it can also be placed on trees.
