Organ-X Pro Insect Freeze Spray is odourless, non-staining and does not contain any insecticidal active substance. It releases liquid from the aerosol at -40 degrees which paralyses the insect before freezing it to death.

Where to use:

Everywhere where usage of biocides is regulated or prohibited. Organ-X Pro Insect Freeze Spray helps to get rid of harmful and nuisance insects.

Suitable for both outdoor and indoor use, in domestic environments such as kitchens, food environments and bedrooms. Ensure you test on a small area before use and be careful using on surfaces sensitive to gel.

Can be used in the presence of children and pets.

Effective on flying and crawling insects including wasps, hornets, flies, mosquitoes, cockroaches, ants, spiders, fleas, bedbugs, moths and silverfish.

USE ONLY IN WELL-VENTILATED AREAS

Instructions for use:

1. Wait for the insect to be slow moving or settled, as the spray is only effective when the contents are used directly on the target.
2. Spray the target insect from a distance of 25-30cm for 2-3 seconds until it is paralyzed.
3. The treatment is complete when the insect is frozen or by spraying until a layer of frost appears.
