WARNING

UFI: TPXW-G88D-E00S-VVMMN

Use specific instructions for use: It is advisable to apply DELTAECT through devices such as pumps or sprays, being careful to apply the solution in cracks and crevices only. The product shall be diluted at a rate of 1:100 in water. The solutions obtained must be sprayed at a dose of 1 litre of in-use solution for 20 m². The in-use dilution will be applied through a low- pressure sprayer (hand-held or knapsack sprayer). Crack and crevice - application must be performed to a band of 0.1 m width on the treated surfaces. Spot treatment - dilute product should be applied to areas frequently preferred by flying insects. The product is not intended to be applied on livestock premises and therefore no contamination to housed animals is expected.

Risk mitigation measures: FOR USE ONLY AS AN INSECTICIDE. FOR INDOOR USE ONLY. Store the product in its original packaging out the reach of children and pets. Wash hands after handling, processing and before meals. Do not mix with other chemicals and products. Avoid contact with treated surfaces. Do not apply in presence of people (especially children), pets or animals. Diluted insecticide solution should never be kept. A new solution must be prepared every time. Do not apply in presence of food/feedstuff. Remove any food/feedstuff from the application site. Remove any tool that may enter into contact with food/feedstuff during treatment. Cover water tanks, feed troughs and other surfaces or equipment that may enter into contact with feed/foodstuffs before treatment to avoid any contamination. Treated areas can be re-occupied by the general public, pets and other animals once the sprayed surfaces are dry. Shake well before use.

Resistance Management: Deltamethrin is used in biocidal products in a limited period and therefore it is not expected to contribute to the development of resistance in target organisms.

Batch number and expiry date, see bottle

In order to avoid any resistance development in target organisms it is recommended to alternate the use of deltamethrin-based products with other insecticidal products not containing pyrethroids.

Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment:

Particulars of likely direct or indirect effects: May cause transient irritation of skin, eyes and mucous membranes.

First aid instructions: General: Remove victim to fresh air. Immediately remove all contaminated clothing. Keep patient at rest. Maintain body temperature. If the person is unconscious, shorten side with the head lower than the rest of the body and the knees bended. Control breathing, if necessary, artificial respiration. Do not just leave the patient under any circumstance. remove to fresh air or hospital and, whenever possible, take the container or label.

Ingestion: If swallowed do not induce vomiting. **Inhalation:** Seek fresh air to the victim (move outdoors). If you notice discomfort, seek medical attention. **Skin Contact:** After contact with skin, wash immediately with soap and water, without rubbing. **Eye Contact:** Rinse immediately with plenty of water for at least 15 minutes with the eyelid held wide open, not forget to remove the lenses. If you notice discomfort, seek medical attention.

Emergency measures to protect the environment: Prevent product from entering the environment (surface and ground water), sewerage, drainage, etc. with the construction of protective barriers and closing drains. Communicate to the competent authorities or tipping leaks into waterways, drains, sewers.

Methods and materials for containment and cleaning: Absorb spill on inert material (sand, kaolin), collect and place in containers for later properly identified as a hazardous waste management.

Conditions of storage and shelf-life of the product under normal conditions of storage: The product should be stored in tightly closed original containers in a cool, dry, well-ventilated area. Avoid high temperatures and direct action of sunlight. Protect from moisture. The containers must be placed in such a way as to allow free air circulation. Do not store with oxidizers, alkalis (caustic solutions), or acids. Keep away from foodstuffs, beverages and feed. Check stocks regularly for damage. Under these conditions, Deltasect can be stored for 4 years.

Instructions for safe disposal of the product and the packaging:

Diluted insecticide solution should never be kept. A new solution must be prepared every time. Do not contaminate ponds/lakes, water pipes or ditches with the diluted product or with empty container. Do not empty into drains. On emptying the container, RINSE CONTAINER THOROUGHLY by using an integrated pressure rinsing device or manually rinsing three times. Add washings to sprayer. Do not reuse packaging. Dispose of contents/ container in accordance with local waste management regulations.

Special labelling provisions for Ireland:

Use biocides safely and sustainably. It is illegal to use this product for uses or in a manner other than that prescribed on this label.

Poison information: For information or to report a poisoning incident contact The National Poisons Information Centre, Beaumont Hospital, Dublin (01 8092166), retain the label for reference.

DISCLAIMER: Respect the uses, doses, conditions and precautions on the packaging which have been determined based on product characteristics and applications for which it is recommended. The treatment should be performed according to good practice taking into account under your responsibility all the specific factors that may be involved and are beyond our control (materials used, application conditions, product mix, etc.). The manufacturer guarantees the quality of its products sold in their original packaging.
