

PLANT BASED (OF&G APPROVED) INSECTICIDE FOR PROFESSIONAL USE AGAINST STORED PRODUCTS INSECTS, FLIES, RED MITES, LITTER BEETLES, MIDGES, COCKROACHES, ANTS AND OTHER CRAWLING INSECTS.

AREAS OF USE

- For use on stored product insects in empty grain storage and empty silos, including stored food or goods areas.
- For use in empty animal housing and farm buildings.
- For use indoors in waste management sites, waste transfer, in and around dustbins and waste collection areas.
- For use indoors and outdoors in and around domestic and commercial properties.

STATUTORY CONDITIONS OF APPROVAL RELATING TO USE FOR USE ONLY AS AN INSECTICIDE

For use only by professional operators.

APPLICATION RATE:

- For use against cockroaches, ants and other crawling insects and flies:
 - Spray 50ml of diluted product per m² in a 15-20 cm strip around areas frequented by insects.
 - Spray 50ml of diluted product per m² into empty communal garbage cans (after waste collection) indoors or outdoors.
 - Spray 200ml of diluted product per 1000m³ against flies and flying insects on foodstuffs stored indoors.

Users must comply in full with all their legal responsibilities under the Control of Pesticides Regulations 1986 (as amended), including complying with all conditions of Approval.

READ ALL PRECAUTIONS BEFORE USE

HSN No 11095-GB, PCS No: 102855

PRECAUTIONS

- *Do not contaminate foodstuffs, eating utensils or food contact surfaces.
- *Unprotected persons and animals should be kept away from treated areas until surfaces are dry.
- *Wash hands and exposed skin before meals and after use.
- *This material and its container must be disposed of in a safe way.
- *HAZARDOUS TO BEES.
- *The COSHH (Control of Substances Hazardous to Health) Regulations 2002 (as amended) apply to the use of this product at work.
- *Avoid excessive contamination of coveralls.
- *Keep away from treated surfaces until dry.
- *Keep in a safe place.
- *Cover all water storage tanks before application.

To avoid risks to human or animal health, or the environment, comply with the instructions for us

DIRECTIONS FOR USE

Use as a mist, thermal fog or surface spray. Approved for use in organic farming, 3-11 applications per year

TYPE OF FORMULATION: EW - Emulsion, oil in water.

Use biocides safely and sustainably. This product should be used in accordance with the product label.

Dispose of contents/container in accordance with local regulations. Poisons information: For information or to report a poisoning incident contact The National Poisons Information centre (01 8092166)

FLYING & CRAWLING INSECTICIDE

EMULSIFIABLE CONCENTRATE

Plant Based Insecticide

Suitable For Organic Farming

Targets Flying & Crawling + Stored Product Insects

APPROVED FOR USE IN ORGANIC SYSTEMS

FOR USE IN EMPTY:

Grain Stores & Silos ✓

Animal Housing ✓

Farm Buildings ✓

PROFESSIONAL USE ONLY

1L

Application	Application rate & method
Surface spray, Pressure Spray & Thermo & Cold Fogging For use against stored product insects (such as confused flour and tobacco beetles, grain weevils, and moths) in empty grain stores and silos and flies and flying insects on foodstuffs stored indoors. For use against biting midge, red mites, litter beetles and other crawling insects in empty animal housing and farm buildings, including animal bedding and manure Indoor use in waste management sites including waste transfer, in and around dustbins and waste collection areas indoors & outdoors	Dilute product to 8% in water (0.4 litre of product with 4.6 litre of water to make 5 litres of RTU). Surface Spray & Pressure Spray 50ml of diluted product per m ² in all infested areas. Remove animals from the treatment area. Using a pressure sprayer (1 to 3 bars), spray the diluted product in all infested areas: - For biting midge, spray on areas where insects settle, mainly walls, areas at the ends of buildings and above door jams (do not spray on feed troughs). - Against red mite, apply the product during the sanitary period on the floor and directly in the litter. Also spray on and under cages, on nesting boxes, in cracks and crevices. Alternate treatment method - For Litter beetle and crawling insects - Spray several 15-20 cm strips around the perimeter of building around lowest part of the wall, uprights and where feeding plates meet the floor to stop beetle migration. Ventilate for the duration of the treatment, then ventilate the room before entering (30 minutes to 2 hours, depending on the volume and ventilation level of the room). Thermo & Cold Fogging: Dilute product to 20% in water (200 ml of product with 800 ml of water). Spray 200ml of diluted product per 1000m ³ against flies and flying insects on foodstuffs stored indoors. Remove all food and beverages before spraying. Do not apply directly to surfaces on which food or feed is stored, prepared or consumed. Protect surfaces from contamination, e.g. by covering or removing them Leave to act for 4 hours, then ventilate well before entering (30 minutes to 2 hours, depending on the volume and ventilation level of the room). For mixing and loading, application by fogging and cleaning of the spray equipment, PPE should be worn which includes gloves, impermeable coverall and mask (APF10).

Organ-X Pro PYR 8 EW

ACTIVE INGREDIENT: Chrysanthemum cinerariaefolium extract from open and mature flowers of Tanacetum cinerariifolium obtained with supercritical carbon dioxide 1.69% w/w technical active, 0.85% w/w pure active

- H410 Very toxic to aquatic life with long lasting effects.
- EUH208 Contains Chrysanthemum cinerariaefolium, extract from open and mature flower of Tanacetum cinerariifolium obtained with supercritical CO₂.
- P010 May produce an allergic reaction
- EUH208 Contains BENZYL ALCOHOL. May produce an allergic reaction.
- P101 If medical advice is needed, have product container or label at hand.
- P102 Keep out of reach of children.
- P103 Read carefully and follow all instructions.
- P273 Avoid release to the environment.
- P391 Collect spillage.
- P501 Dispose of contents/container according to the regulation
