7.2. Conditions for safe storage, including any incompatibilities

Do not expose to temperature exceeding 50 ° C
Store in a dry, well ventilated place
Recommendations applicable to warehouses and reserves storing aerosols.
It is recommended to denormalize aerosols in the stock. The "spray" area should be delimited either with a metal mesh (mesh of 5cm maximum), forming a cage or using walls, to avoid projections of aerosols which may ignite the rest of the stock.
Do not smoke
To reduce the risk of falls, pallets should be positioned as close to the floor. ensure that those lower layers are not crushed (risk of leaks by compression).
It is recommended to ventilate the area and not store any sprays near heat sources, including direct sunlight, and use the fire procedure in case of works.
Store away from: open flame, direct sunlight, sparks, heat.
Store at below 20 °C. Keep away from unguarded flame and heat sources. Avoid direct exposure to sunlight.
Keep away from unguarded flame, sparks, and heat sources. Avoid direct exposure to sunlight.
