

## BLACK PEARL PASTE

### Paste bait containing 4%w/w of alphachloralose

**Authorisation** No: GB-2014-0870-1-0001 / NI-2014-0870-1-0001; **Authorisation holder** : (GB) LODI UK - Unit 104, Potter Space, 7 Kidderminster Road, Cutnall Green, Droitwich, WR9 0NS - UNITED KINGDOM / (NI) Lodi S.A.S - Parc d'Activités des Quatre Routes, 35390 Grand-Fougeray, FRANCE

**User category:** For professional use only. **Field of use:** For Indoor use only. **Target organism:** Mus musculus (House mouse).

**Application method:** For use only in tamper resistant bait boxes or covered bait stations. Ready-to-use bait to be used in tamper resistant bait stations. Tamper-resistant bait stations must be: Strong enough to prevent entry or destruction by dogs; Strong enough to prevent entry or destruction by children under six years of age using hands, feet or objects reasonably expected to be available in the use area (e.g. household objects, toys etc); Lockable or sealable so that children and dogs cannot gain access through the opening or mechanisms used to fill the bait compartments.

**Application rate(s) and frequency:** For high infestation: 5g to 20g of bait in a mouse bait station every 3 metres. For low infestation: 5g to 20g bait in a mouse bait station every 5 metres.

**Instructions for use:** Do not open the sachets. Wash hands and exposed skin before meals and after use. Do not place bait where food, feed or water could become contaminated. Prevent access to bait by children, birds and non-target animals (particularly dogs, cats, pigs and poultry). Baits must be securely deposited in a way so as to minimize the risk of consumption by other animals or children. Where possible, secure baits so that they cannot be dragged away. Bait should be laid for periods of at most 7- 10 days. Search for and remove dead rodents at frequent intervals during treatment, at least as often as when baits are checked and/or replenished. Due to the action of this rodenticide this may need to be as often as every few hours. Dispose of dead rodents in accordance with local requirements. Poisoned rodents may be disposed of by the waste producer at an incinerator or landfill permitted to accept that type of waste, or collected by a registered waste carrier and taken for disposal at a suitably permitted site. For further information on disposal contact the Environment Agency (<http://www.environment-agency.gov.uk>) or SEPA (<http://www.sepa.org.uk>).

Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment. If exposed, contact immediately a poisoning control center or a doctor and describe the situation (give information on the label and assess the exposition rate). If inhaled: breathe fresh air and keep at rest. If a contact occurs with skin: Remove contaminated clothes and wash skin with soap and rinse copiously with water. Do not use solvents or thinners. If a contact occurs with eyes: Wash copiously under a trickle of water (tepid if possible) for several minutes, keeping eyelids open under the trickle of water.

## BLACK PEARL PASTE

Alphachloralose (CAS: 15879-93-3 ) : 4% w/w

**Warning, H410 Very toxic to aquatic life with long lasting effects.**
