GRAIN BAIT

- ✓ Fastest killing poison in the UK
- ✓ Bait works instantly
- ✓ Resistance busting active
- ✓ Highly attractive to mice
- ✓ Professional use only

EN3189'a

BLACK PEARL GRAIN

Granular bait containing 4%w/w of alphachloralose

Authorisation No: UK-2014-0869

User category: For professional use only, Field of use: For indoor use only

Application method: For use only in temper resistant bait boxes or covered bait stations.

Target organism: *Mus musculus* (House mouse). Juveniles and adults.

Application rate(s) and frequency: For high infestation: 10g to 25g of bait in a mouse bait station every 3 metres. For low infestation: 10g to 25g bait in a mouse bait station every 5 metres.

Instructions for use: Do not open the sachets. Wash hands and exposed skin before meals and after use. Do not place bait where food, feed or water could become contaminated. Prevent access to bait by children, birds and non-target animals (particularly dogs, cats, pigs and poultry). Baits must be securely deposited in a way so as to minimize the risk of consumption by other animals or children. Where possible, secure baits so that they cannot be dragged away. Bait should be laid for periods of at most 7- 10 days. Search for and remove dead rodents at frequent intervals during treatment, at least as often as when baits are checked and/or replenished. Due to the action of this rodenticide this may need to be as often as every few hours. Dispose of dead rodents in accordance with local requirements. Poisoned rodents may be disposed of by the waste producer at an incinerator or landfill permitted to accept that type of waste, or collected by a registered waste carrier and taken for disposal at a suitably permitted site. For further information on disposal contact the Environment Agency (<http://www.environment-agency.gov.uk>) or SEPA (<http://www.sepa.org.uk>).

BLACK PEARL GRAIN

Alphachloralose (CAS: 15879-93-3) : 4% w/w

Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment.

If exposed, contact immediately a poisoning control centre or a doctor and describe the situation (give information on the label and assess the exposition rate): If inhaled: breathe fresh air and keep at rest. If a contact occurs with skin: Remove contaminated clothes and wash skin with soap and rinse copiously with water. Do not use solvents or thinners. If a contact occurs with eyes: Wash copiously under a trickle of water (tepid if possible) for several minutes, keeping eyelids open under the trickle of water. If swallowed: Do not induce vomiting. Whatever the quantity of the product ingested, do not eat and do not drink. Install the victim in the recovery position and protect him against injury from sudden movements and convulsion. Monitor breathing. Follow the doctor's advice. Note to doctor: the product BLACK PEARL GRAIN contains a depressant and convulsant of the nervous system. The bronchial congestion is fast. The treatment is symptomatic, there is no specific antidote.

Instruction for safe disposal of the product and its packaging: Dead rodents and bait found outside bait points should be disposed of using protective gloves. Remove all baits after treatment and dispose of them in accordance with local requirements. For information on disposal in the UK contact the Environment Agency (<http://www.environment-agency.gov.uk>) or SEPA (<http://www.sepa.org.uk>).
