DEFENDER

Poultry Hygiene

Your Ultimate Defence Shield Against Pests & Disease

A NUTRITIONAL SUPPLEMENT, ADDED TO THE DRINKING WATER OF LAYING HENS, THAT HELPS IMPROVE THE NATURAL RESISTANCE OF POULTRY THROUGH NATURAL PLANT EXTRACTS.

APPLICATION TO POULTRY DRINKING WATER

DILUTION 500mL / 1000L

COMPLEMENTARY FEED ADDITIVE FOR LAYERS

- Liquid product to administer to poultry through drinking water.
- Supports the natural resistance of the hens.
- Ideal for laying hens and promotes a healthy response.
- Nutrients support birds during times of stress or anemia.
- Natural ingredients suitable for organic farming.

Defender Poultry Tonic contributes to support the natural resistance of layers. The natural ingredients provide a positive impact to layer's own defences and reinforce the bird's natural antibodies to provide a healthy response in laying hens. Nutrients comprehensively support birds during times of stress or anemia. Defender Poultry Tonic is a liquid feed additive to administer in drinking water. Ideally introduce (Protocol 1) at the start of the new flock, but can introduce at any point (Protocol 2) during the life cycle. In take guaranteed thanks to the application in drinking water. Easy to apply.

PRODUCT INFORMATION: Composition per L: Magnesium chloride, Sodium chloride, Vitamin C, Plant extracts (Chrysanthemum vulgare, Thymus vulgaris, Inula helenium, Lippia citrifolia).

RECOMMENDATIONS FOR USE:

DEFENDER POULTRY TONIC must be administered in drinking water at the dosage of 0.5L for 1000 L of water, at the rate of 200 ml per hen.

- Protocol 1. Continuous application from flock introduction:
- 1 day per week, for the first 6 weeks. Renew this treatment every month for 2 consecutive days.
- Protocol 2. Intermediate application in case of debilities:
- For 4 consecutive days plus 2 days three weeks later and 2 days four weeks later. Renew this treatment every 15 to 20 weeks for 4 consecutive days.

STANDARD DEFENDER POULTRY TONIC TREATMENT PROTOCOL:

An effective protocol should always be farm specific. Ask our advice in case of increased infection pressure.

STORAGE/DISPOSAL: Store in a cool and dry place, between 5°C and 25°C, away from direct light and heat sources. Defender Poultry Tonic should not be stored near electrical devices.

DEFENDER
POULTRY RECHARGE

COMPLIMENTARY LIQUID FEED ADDITIVE FOR POULTRY AND LIVESTOCK	 APPLICATION TO POULTRY DRINKING WATER	 CONSERVATION 9°C - 25°C
--	--	--

Defender Poultry Recharge is an accurately balanced combination of water-soluble and lipid-soluble vitamins, amino acids and minerals to support hens with a nutritional imbalance during times of growth, development and signs of stress or anaemia. Intended for the prevention of vitamin and amino acid deficiencies. Supports during times of stress due to treatment, vaccination, disease, ectoparasites recovery, feather

pecking, transport, extreme temperature or climatic changes, moulting periods and times of peak egg-laying. Feed conversion rates increase as birds metabolise fats, proteins, and carbohydrates. Boosting poultry energy, strength and natural defences. Can be used alongside Defender Poultry Tonic for ultimate poultry welfare and productivity.
