Maggots

2% Cyromazine

Professional fly control for the intensive pig, poultry & livestock farmer. Maggots is a highly efficient larvicide specially formulated with the growth regulator Cyromazine to target and attack 80% of a fly's lifecycle. Easy to use the granules can either be dry scattered on slurry or sprayed after dilution in water. Effectively eliminates and controls fly larvae in animal, pig & poultry housing and waste management sites. Maggots is the only effective way of stopping fly problems and the results can be seen on the adult fly population in approximately 2 weeks after first application.

Product Code	MG10	MG20
Description	Loose Granules	Loose Granules
Product Size	10kg Bucket	20kg Sack

Perbio Choc RTU 5L

0.64% Permethrin & 0.63% Tetramethrin

Perbio Choc is the UK's strongest oil based ready to use insecticide for the instant and on-going control of flies, red mites and all flying and crawling insects. Can be sprayed or fogged with the residual effective for up to 3 months ensuring the treated area remains pest free for a long length of time. For use in and around farm buildings, dairies, animal housing plus amenity areas, sewage works, refuse disposal and waste storage.

Organ-X Pro Formula

Fly Trap XL

A non-toxic, eco-friendly solution to fly problems. Tried & tested the Fly Trap XL uses fast catch technology, each trap can catch up to 40,000 flies. Strong and sealable bag design, once water is added the formulation will begin to ferment and flies will become attracted within 1 - 2 days. For best results hang in farm buildings, animal housing, gardens, waste & industrial sites.

• Twice the catch speed of competitor fly traps

Product Code	FLYBAG
Description	Hanging Fly Trap
Product Size	Box of 12

Concentrate makes the equivalent of up to 20 drums of ready-to-use insecticide spray

Phobi CAPS

9.2% Cypermethrin & 0.46% Prallethrin

A micro-capsulated insecticide used against crawling & flying insects such as flies and red mites, found in and around the farm, livestock housing, refuse disposal and waste storage areas. Fast knockdown, odourless and non-staining Prallethrin provide a shock effect while the regular and continuous release of Cypermethrin ensures the stability to light, temperature, and humidity.

HSE: 10658 PCS: 100101

Product Code	I7216
Description	Concentrate Insecticide
Product Size	500ml Dosing Bottle

Larvenol

0.4% S-Methoprene

On farm fly control, Larvenol is an innovative insect growth regulator designed with progressive release to effectively control maggots and larvae. The unique active S-Methoprene inhibits larvae from maturing into adult flies. Apply as a granule directly to the muck or areas where flies and maggots are breeding. For use in poultry and livestock housing, including calf/animal rearing under straw bedding. Effective for up to 8 weeks depending on use and the level of infestation.
