

Practical advice:

Wait for the insect to be laid or fixed.

Hold the aerosol upside down. As the spray is very powerful do not get too close to the insect with the extension tube, as it could be blown away by the power of the spray.

Do not spray near live electrical equipment. Use only when the equipment is not powered, if contact is made wait 5 minutes before powering up the equipment.

Do not spray on the skin, risk of ice burns.

Never shake the aerosol while in use.

DANGER

P102 Keep out of reach of children.

P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P211 Do not spray on an open flame or other ignition source. P251 Do not pierce or burn, even after use.

P251 - Do not pierce or burn, even after use. P260 - Do not breathe spray. P271 - Use only outdoors or in a well-ventilated area.

ORGAN-X PRO
Cryo Freeze Spray

**Lightning elimination
solution for crawling
and flying insects!**

Neutralizes and instantly kills insects.

Organ-X Pro Cryo Freeze Spray is chemical free, odourless and non-staining, the liquid sprays from the aerosol at -40 degrees, paralysing the insect before freezing it to death.

Where to use:

Everywhere where usage of biocides is regulated or prohibited, Organ-X Pro Cryo Freeze Spray helps to get rid of harmful and nuisance insects.

Suitable for both outdoor and indoor use, in open areas, such as kitchens, food environments, bedrooms. Ensure you test on a small area before use and be careful of surfaces sensitive to gel.

Safe to use around children and pets.

Effective on flying and crawling insects; wasp nests, cockroaches, spiders, ants, fleas, bedbugs, silverfish and against flies, mosquitoes, wasps, hornets, etc.

Mosquitoes

Flies

Bedbugs

Spiders

Moths

Wasps/Hornets

Ants

Cockroaches

Instructions for use:

1. Mount the extension tube on the diffuser.
2. Wait for the insect to be slow moving or settled.
3. Hold the aerosol upside down and spray with pressure for 2 to 3 seconds 25-30 cm from the target insect, until it is paralyzed.
4. The treatment is complete when the insect is frozen, or by spraying until a layer of frost appears.
