CLOTHES  
**MOTH**  
TRAP

Non-toxic trap with sexual pheromone for the detection and the prevention of clothes moths in carpets, curtains, clothing and all wool fabrics. Clothes moth larvae feed on keratin in wool, feathers, fur, hair, etc. They are especially damaging to fabric stained with beverages, urine, oil from hair and sweat. This trap will lure the male clothes moths. An early detection will allow you to remove or to immediately treat the attacked material.

**Directions for use:**

Remove the covering strip from the adhesive surface. Fold as shown and place the traps in the neighbourhood of the objects to be protected. The best result is obtained by putting the trap on the ground. If the strip is difficult to remove, put the trap in a Refrigerator for 2 - 4 minutes. Check the trap once a week and replace every 2 months. 1 Trap per drawer or per room of maximum 40m<sup>2</sup> (eg. 4 x 4 x 2.5m).

KEEP OUT OF REACH OF CHILDREN
