## Ant & Crawling Insect Killer Spray

### Organ-X Spray with Bio-Trap Insect Technology

Works by physically entrapping ants and crawling insects such as silverfish, cockroaches, woodlice, and earwigs in a unique biodegradable vegetable polymer (backed by 2 years of development & testing). Designed to halt and immobilize insects by coating on contact. Due to the physical mode of action, insects cannot become resistant to the formulation. Organ-X Spray controls all stages of an insect's life cycle including eggs, larvae, nymphs, pupae and adults on contact.

#### Instructions for use:

Spray directly and thoroughly at ants and crawling insects. Do not spray directly on birds, animals, plants or persons. Make sure they have a good coating of Organ-X Spray. Due to the mode of action, ants and crawling insects coated with Organ-X spray are scientifically proven to die after a few minutes without the need for insecticide intervention.

For complete insect control, use alongside Organ-X Bug Killer Powder.

Always read the directions of use before applying and test spray on a small inconspicuous area to check surface compatibility.

**DO NOT SPRAY FOOD CONTACT SURFACES OR PLANTS.**  
**KEEP IN A DRY AND COOL PLACE.**  
**KEEP AWAY FROM HEAT AND DIRECT SUNLIGHT.**  
**STORE IN ORIGINAL CONTAINER, TIGHTLY CLOSED**  
**KEEP OUT OF REACH OF CHILDREN**  
**KEEP AWAY FROM FOOD, DRINK AND FEED.**
