CURB GARDEN LIQUID

A ready to use vertebrate repellent containing 10.4 g/L aluminium ammonium sulphate for use in the garden to reduce damage caused by various animal and bird species and for the deterrence of fouling from dogs (cats) and foxes.

FOR USE ONLY AS AMATEUR ANIMAL AND BIRD REPELLENT

INSTRUCTIONS FOR USE

CURB GARDEN LIQUID reduces damage in the garden caused by birds, rabbits, hares and moles. Limited evidence indicates the effects on cats, deer and deterring fouling by dogs and foxes. For optimum effectiveness application should be made as soon as the problem is observed. The product is not rainfast and reapplication may be necessary for extended activity.

ENVIRONMENTAL PROTECTION

DO NOT empty into drains

DO NOT contaminate water with the product or its use container. Dispose of empty packaging in the dustbin.

WHERE TO USE

Curb Garden Liquid can be used to repel animals and foxes on all edible crops, non-edible crops, ornamental borders, lawns/grass, patios, paths and driveways. Apply Curb Garden Liquid either before or immediately after the first signs of damage under dry conditions and ensure that the spray deposit dries on the crop/plants/area to be protected. It is not systemic and fresh application may be necessary on plant re-growth.

SAFETY INSTRUCTIONS

Protection during use

- Keep out of reach of children.
- WASH HANDS AFTER USE
- If medical advice is needed, have product container or label at hand.

Storage and disposal:

- KEEP AWAY FROM CHILDREN AND PETS.
- KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place.
- EMPTY CONTAINER THOROUGHLY and dispose of safely.
- Do not empty into drains.

- Do not contaminate water with the product or its container.
- PROTECT FROM FROST

- Dispose of empty packaging by recycling.
- Dispose of unused product in its container at a household waste site (civic amenity site).

Contact your local council (local authority) for details.

HOW TO USE: SHAKE WELL

BEFORE USE CURB GARDEN LIQUID

is a ready to use formulation suitable for immediate application without any mixing or dilution. Activate the spray nozzle as indicated on the packaging and lightly spray areas to be treated ensuring good coverage. Once completed the trigger mechanism should be turned off prior to storage. 1.0L of product is sufficient to treat 50 m².

To repel domestic animals (cats and dogs) and foxes

it is recommended that previous fouling is removed and the area washed down with detergent/disinfectant prior to application. If the fouling pattern is well established repeat applications will be necessary.

To deter moles it is recommended that all molehills are levelled or removed and grass or vegetation is closely mown. Where moles are moving into new areas apply in a 4.0 m band along existing runs. Where established infestations are present divide the area to be treated into 10 m wide bands and commence treatment at the edge of the infested area furthest from the original point of entry. Repeat application in successive bands at intervals to move the moles out of the area to be protected. Repeat as necessary for extended control. For best results apply to moist bare ground or closely mown turf immediately prior to irrigation or rain. To be effective treatment must not dry on the grass surface.

To deter birds spray on new lawn seed and around crops.

Contains 10.4 g/L aluminium ammonium sulphate

P102 KEEP OUT OF REACH OF CHILDREN

P273 AVOID RELEASE TO THE ENVIRONMENT.

P270 WHEN USING DO NOT EAT, DRINK OR SMOKE when using this product.
