Red Mite Killer Spray

Organ-X Spray with Bio-Trap Insect Technology

Works by physically entrapping insects in a unique biodegradable vegetable polymer (backed by 2 years of development & testing). Designed to halt and immobilize red mite by coating on contact. Due to the physical mode of action, red mite cannot become resistant to the formulation. Organ-X Spray controls all stages of an red mite's life cycle including eggs, larvae, nymphs, pupae and adults on contact.

Instructions for use:

Remove birds, eggs, feed, eating and drinking utensils.

Remove all bedding and clean housing thoroughly.

Spray directly and thoroughly at red mite. Do not spray directly on birds, animals, plants or persons. Use in and around poultry housing. Spray directly onto all surfaces where red mite are located including the nesting box and underside of the roof. Take particular care to spray in hard-to-reach areas, cracks and crevices. Due to the mode of action, poultry mites coated with Organ-X spray are scientifically proven to die within the hour. Re-introduce poultry once treatment is complete.

For heavy infestations (any eggs, nymphs, adults not coated by product) apply initially, repeat 3 days later and then use weekly as part of your regular cleaning routine.

For maximum bird welfare and living conditions, use alongside Organ-X Desi-Dust Natural Hygiene Powder, Organ-X Contact Red Mite Killer Powder and Organ-X Smoke Bomb Mini Red Mite Killer.

DO NOT SPRAY FOOD CONTACT SURFACES.
KEEP IN A DRY AND COOL PLACE.
KEEP AWAY FROM HEAT AND DIRECT SUNLIGHT.
STORE IN ORIGINAL CONTAINER, TIGHTLY CLOSED.
KEEP OUT OF REACH OF CHILDREN.
KEEP AWAY FROM FOOD, DRINK AND FEED.
