Spider Killer Spray

Organ-X Spray with Bio-Trap Insect Technology

Works by physically entrapping spiders in a unique biodegradable vegetable polymer (backed by 2 years of development & testing). Designed to halt and immobilize spiders by coating on contact. Due to the physical mode of action, spiders cannot become resistant to the formulation. Organ-X Spray controls all stages of a spider's life cycle including eggs, larvae, nymphs, pupae and adults on contact.

Instructions for use:

Spray directly and thoroughly on spiders. Do not spray directly on birds, animals, plants or persons. Make sure they have a good coating of spray.

Due to the mode of action, spiders coated with Organ-X spray are scientifically proven to die after a few minutes without the need for insecticide intervention.

For complete spider control, use alongside Organ-X Spider Killer Freeze Blast and Organ-X Contact Spider Killer Powder.

Always read the directions of use before applying and test spray on a small inconspicuous area to check surface compatibility.

DO NOT SPRAY FOOD CONTACT SURFACES.
KEEP IN A DRY AND COOL PLACE.
KEEP AWAY FROM HEAT AND DIRECT SUNLIGHT.
STORE IN ORIGINAL CONTAINER, TIGHTLY CLOSED.
KEEP OUT OF REACH OF CHILDREN
KEEP AWAY FROM FOOD, DRINK AND FEED.
