Bug Killer

Organ-X Bug Killer

Pyrethrum is extracted from natural chrysanthemum flowers and formulated into a fast action, knockdown and contact insecticide powder, rapidly killing wasps and their nests.

Instructions for use:

Always exclude children and pets while treatment is in progress. Shake well before use. Wear protective clothing to prevent stings. Remove cap, hold pack horizontally or pointing downwards and the dust thoroughly and swiftly into where wasps are entering. This should be done in the late evening when most of the wasps have returned to the nest. Move away from the treated area as soon as possible. Newly hatched wasps will continue to appear for several days and a second application may be required, particularly in wet weather.

Note this puffer pack may not be suitable for suspended nests or nests in confined spaces due to possible difficulties in application. Ensure ALL PRODUCT has been removed before allowing pets back into treated area.
