Email: sales@lodi-uk.com

DIRECTIONS FOR USE

NOT TO BE USED IN THE PRESENCE OF BIRDS, PEOPLE, PLANTS AND ANIMALS.

Place each smoke generator on a fireproof base of approximately 300mm x 300mm but NOT in a bucket or other enclosed space. Make sure to clear any bedding, eggs, feed stuff, drink or other combustible materials. Seal the empty building or greenhouse as much as possible so not to allow smoke to escape the building. Take the required number of smoke generators required to treat the poultry building or green house depending on the target insect. E.g. 1 x smoke for Red Mites treats 7.5m³. Tear off tag and remove container cap. When several smoke generators are being used, space them throughout the area to be treated, and prepare all for ignition before lighting the first. Light the igniter using a match or lighter. Do not leave lighted match on generator. Light smoke generators in sequence, starting with the furthest from an identified

exit. Leave for not less than two hours or one hour per 1.5 m ceiling height. After treatment is complete, open windows and doors and ventilate thoroughly. WASH HANDS AND EXPOSED SKIN before meals and after use. KEEP IN A SAFE PLACE. Keep away from sources of ignition - No smoking. Keep out of the reach of children. WASH ANY CONTAMINATION from skin or eyes immediately. Keep away from food, drink and animal feeding stuff. VENTILATE TREATED AREAS THOROUGHLY after application. PLACE PRODUCT ON A HEAT PROOF SURFACE. FROM THE AREA TO BE TREATED AND COMPLETELY COVER FISHTANKS.

Manufactured by: Octavius Hunt Ltd, Dove Lane, Redfield, Bristol, BS5 9NQ, UK
