	215 x 140mm	Various Darker Colours	8 across x 5 down	Various inner border styles, layers etc., Smaller holes	Victorian "VIC" airbrick cover

***IMPORTANT: SMALL HEPWORTH & REDBANK AIRBRICK COVERS:**

- The small Hepworth and small Redbank airbricks are the same size.
- The Hepworth small airbrick cover will fit a Redbank small airbrick and vice versa, BUT there is one key difference, which is the size of the rubber washer in the accompanying fixing kit.
- The Hepworth uses a 4mm rubber washer and the Redbank uses a 2mm rubber washer.
- The washer is important to providing additional free air movement around the airbrick cover.
- When fitting your airbrick cover, if the rubber washer does not give a 2mm air gap around the cover, it will be because you have the wrong airbrick cover kit.
- Key distinguishing features: the Redbank is darker in colour and has a shallower face to that of the Hepworth.

PLEASE NOTE: Due to the fixings, covers will reduce the free air space of the airbrick by 10%.

WARNING!
ProventGuard® airbrick covers are **NOT** for use with airbricks or vents used for gas appliances, boilers, fireplaces, multi-fuel stoves, electrical ventilation systems or other appliances.
