

RACAN RAPID
Paste bait containing 4%w/w of alphachloralose
cas N° 15879-93-3

RACAN
RAPID PASTE

Authorisation No: UK-2014-0870-009

User category: For Non-professional use only.

Field of use: For indoor use only.

Application method: For use only in tamper resistant bait boxes.

Target organism: *Mus musculus* (House mouse), (Adults and Juveniles)

Application rate(s) and frequency: For high infestation: 10g to 20g of bait in a mouse bait station every 3 metres.
For low infestation: 10g to 20g bait in a mouse bait station every 5 metres.

Instructions for use: Do not open the sachets. Wash hands and exposed skin before meals and after use. Do not place bait where food, animal feed or water could become contaminated. Prevent access to bait by children, birds and non-target animals (particularly dogs, cats, pigs and poultry).

Baits must be securely deposited in a way so as to minimize the risk of consumption by other animals or children. Where possible, secure baits so that they cannot be dragged away. Bait should be laid for periods of at most 7- 10 days. Search for and remove dead rodents at frequent intervals during treatment, at least as often as when baits are checked and/or replenished. Due to the action of this rodenticide this may need to be as often as every few hours. Dispose of dead rodents in accordance with local requirements. Poisoned rodents should be double-bagged using plastic bags and either disposed of in a household waste bin with a secure lid to prevent access of wildlife or pets or collected by a specialist waste contractor or the local authority. If swallowed, seek medical advice immediately and show the doctor this container or label. Keep away from food, drink and animal foodstuff. When using do not eat, drink or smoke. Keep locked up and out of the reach of children.

Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment.

If exposed, contact immediately a poisoning control centre or a doctor and describe the situation. If inhaled: breathe fresh air and keep at rest. If contact occurs with skin: Remove contaminated clothes and wash skin with soap and rinse continuously with water. Do not use solvents or thinners. If a contact occurs with eyes: Wash continuously under a trickle of water (rapid if possible) for several minutes, keeping eyelids open under the trickle of water. If swallowed: Do not induce vomiting. Whatever the quantity of the product ingested, do not eat and do not drink. Lay the victim in the recovery position and protect them against injury from sudden movements and convulsion. Monitor breathing. Follow the doctor's advice. Note to doctor: the product RACAN RAPID PASTE contains a depressant and convulsant of the nervous system. Bronchial congestion is rapid. The treatment is symptomatic, there is no specific antidote.

Instruction for safe disposal of the product and its packaging:

Dead rodents and bait found outside bait points should be disposed of using protective gloves. Remove all baits after treatment and dispose of them in accordance with local requirements. Waste bait should be double bagged in plastic bags and disposed of in a household waste bin with a secure lid to prevent access of wildlife or pets or taken to a civic amenity site. For information on civic amenity sites contact the local authority.

REFILLABLE PRE-BAITED
RACAN RAPID MOUSE STATION
WITH KEY INCLUDED

Once the bait stations have been used you can either dispose of them or refill with Racan Rapid Sachets as below:

1 Unclip the key from the side of the bait station.

2 Place the 2 points of the key into the holes at the front and press firmly.

3 Place one or two sachets of bait in either corner of the bait station on top of the three prongs and close lid firmly. The bait remains secured within.

Place station where there is mouse activity.

RACAN
RAPID PASTE

ADVANCED
MICROENCAPSULATION
TECHNOLOGY

New RACAN Rapid
with patented
microencapsulation
technology.

RACAN Rapid's advanced breakthrough technology ensures mice hit a lethal dose from as little as a mouthful. The effects of immobilisation are almost immediate sending mice into a peaceful sleep before their untimely death.

The active ingredient Alphachloralose is unlike widely used anticoagulant baits which take days before the effects are felt.

This pack contains:
2 pre-baited, tamper resistant and reusable bait stations with attached key so you can buy RACAN RAPID refill sachets for future eradication.
