# MOUSE KILLER PASTE BAIT

ADVANCED  
MICROENCAPSULATION  
TECHNOLOGY

**TARGETS MICE FAST**  
FORMULATED TO CONTROL MICE IN HOURS!

**80g**  
**8 x 10g**  
**PASTE**  
**SACHETS**

**RACAN**  
RAPID PASTE

ADVANCED  
MICROENCAPSULATION  
TECHNOLOGY

**New RACAN Rapid**  
with patented  
microencapsulation  
technology.

RACAN Rapid's advanced  
breakthrough technology ensures  
mice hit a lethal dose from as  
little as a mouthful. The effects of  
immobilisation are almost immediate  
sending mice into a peaceful sleep  
before their untimely death.

Alphachloralose targets mice fast,  
formulated to control in hours, unlike  
widely used anticoagulant baits which  
take days before the effects are felt.

**This pack contains**  
**8 x 10g paste sachets**  
produced to be highly  
palatable and lethal to mice.

**RACAN RAPID**  
Paste bait containing 4%w/w of alphachloralose  
Cas No: 15879-93-3

**RACAN**  
RAPID PASTE

**Authorisation No:** UK-2014-0870-1-0009  
**User category:** For Non-professional use only.  
**Field of use:** For Indoor use only.  
**Application method:** For use only in tamper resistant bait boxes.  
**Target organism:** Mus musculus (House mouse). (Adults and Juveniles).  
**Type of formulation:** Ready-for-use sachets.

**Application rate(s) and frequency:** For high infestation: 10g to 20g of bait in a mouse bait station every 3 metres.  
For low infestation: 10g to 20g bait in a mouse bait station every 5 metres.

**Instructions for use:** Do not open the sachets. Wash hands and exposed skin before meals and after use. Do not  
place bait where food, animal feed or water could become contaminated. Prevent access to bait by children, birds  
and non-target animals (particularly dogs, cats, pigs and poultry).

Baits must be securely deposited in a way so as to minimize the risk of consumption by other animals or children.  
Where possible, secure baits so that they cannot be dragged away. Bait should be laid for periods of at most 7 - 10  
days. Search for and remove dead rodents at frequent intervals during treatment, at least as often as when baits  
are checked and/or replenished. Due to the action of this rodenticide this may need to be as often as every few  
hours. Dispose of dead rodents in accordance with local requirements. Poisoned rodents should be double-bagged  
using plastic bags and either disposed of in a household waste bin with a secure lid to prevent access of wildlife  
or pets or collected by a specialist waste contractor or the local authority. If swallowed, seek medical advice  
immediately and show the doctor this container or label. Keep away from food, drink and animal foodstuff. When  
using do not eat, drink or smoke. Keep locked up and out of the reach of children.

**Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the  
environment.**

If exposed, contact immediately a poisoning control centre or a doctor and describe the situation (give information  
on the label and assess the exposition rate). If contact occurs with skin: Remove contaminated clothes and wash  
skin with soap and rinse continuously with water. Do not use solvents or thinners. If a contact occurs with eyes:  
Wash continuously under a trickle of water (tepid if possible) for several minutes, keeping eyelids open under the  
trickle of water. If swallowed: Do not induce vomiting. Whatever the quantity of the product ingested, do not eat  
and do not drink. Lay the victim in the recovery position and protect them against injury from sudden movements  
and convulsion. Monitor breathing. Follow the doctor's advice. Note to doctor: the product RACAN RAPID contains  
a depressant and convulsant of the nervous system. Bronchial congestion is rapid. The treatment is symptomatic,  
there is no specific antidote.

**Instruction for safe disposal of the product and its packaging:**

Dead rodents and bait found outside bait points should be disposed of using protective gloves. Remove all baits  
after treatment and dispose of them in accordance with local requirements. Waste bait should be double bagged  
in plastic bags and disposed of in a household waste bin with a secure lid to prevent access of wildlife or pets or  
taken to a civic amenity site. For information on civic amenity sites contact the local authority.
