

Product Name: Slug Defence - barrier granules (carton)

Item No.: ECF0008

Size: 5kg

Brand: ECOFECTIVE

Label Version: v1

Issue Date: 12 July 2019

[Front Label:](#)

**ECOFECTIVE
Slug Defence
Slug Barrier Granules**
NATURAL - non-toxic barrier to protect plants from slugs and snail damage.

CHILD & PET SAFE

[Contents:](#) 5kg

[Back of carton:](#)

Slug Barrier Granules are a natural ready to use granule that can be applied around the base of edible and ornamental plants both in the garden and plant pots, to protect against slug and snail damage.

INSTRUCTIONS FOR USE

Garden areas: On planting out into garden areas, draw a circle around the plant and check for any sign of slugs and snails within this circle. If all clear of slugs and snails, apply the barrier using up to 15g of barrier granules up to 2cm deep around the root of the plant to enclose it.

Pots & Tubs: Apply 10 - 15g of barrier granules up to 2cm in height as a decorative dressing to the top layer of the pot or tub. If for decoration, push the granules into the stem of the plant to encircle them.

Please note: The product works best on newly planted pots & tubs, as established pots & tubs may already have slugs and snails present, so control could be reduced.

- Safe to use around children, pets & wildlife
- Provides a physical barrier against slugs & snails
- Natural product which is also suitable for organic gardening

General Advice

Do not apply in windy weather.

Supervise all children in the garden area during application and wash hands after use.

Children and pets can use the treated areas immediately after application.

Keep the carton stored in a dry place away from children and pets.

Contents may settle during transit
