STORM

PATHS/PATIOS/DRIVEWAYS/GRAVEL

Storm Weed & Moss Killer MAPP 20798 contains 60g/l acetic acid as a ready to use formulation. For the control of weeds on areas not intended to bear vegetation and unwanted vegetation. **DO NOT USE ON LAWNS. FOR USE ONLY AS AN AMATEUR WEEDKILLER.**

*This information is to help distinguish from other products that may contain glyphosate.

WHEN TO USE

Storm Weed & Moss Killer is a non-selective amateur weed killer and moss killer active against most soft plant tissue with which it comes into contact. Weeds and moss are controlled by covering their foliage completely and evenly with spray. After spraying, the foliage of treated weeds and moss begins to wither and die, effects become visible within 4 hours with full control after 24 hours. Plant roots are not killed, and new foliage may grow, particularly from the roots of perennial weeds. Annual weeds and moss with small roots die back completely but re-treatment will usually be necessary, especially to keep down perennial weeds. Use Storm Weed & Moss Killer to achieve control of weeds and moss. Best results are achieved against tender, small weeds, and moss less than 10cm high. Ideally spray in spring and repeat as necessary over the growing season, up to a maximum of 6 applications per year with a minimum of 7 days between applications.

WHERE TO USE

Storm Weed & Moss Killer may be used to control weeds and moss in a wide variety of situations, such as in unplanted areas of the garden, around buildings and in similar situations where weed control is required. Keep spray off vegetables, flowers, shrubs, and lawns.

HOW TO USE

Turn the nozzle to the 'ON' position. Spray the foliage of the weeds or moss completely and evenly until the leaves and stems are fully wetted but avoid spray off from the leaves (no more than 100ml/m²). After spraying turn the nozzle to the 'OFF' position. Repeat after 14 days against surviving weeds and moss if necessary, or when fresh growth is seen but ensure there is a minimum of 7 days between treatments and no more than 6 treatments are permitted per year. Apply on a dry day when rain is not expected. Do not apply where rainfall is expected within 6 hours of application. Rain after spraying may wash spray from the leaves and lead to a poor result. After spraying keep people and animals off dense patches of weeds and moss until the spray has dried, often just 15-20 minutes. However, this is not necessary for treated areas containing only occasional, low, or prostrate weeds and moss such as may be found on pathways. Use of Storm Weed & Moss Killer may cause some surfaces to become slippery for a short time after spraying. There are no residual effects of Storm Weed & Moss Killer in the soil. Sowing or planting may be undertaken as soon as the weeds or moss have died. This pack covers approximately 10m².

Safety Instructions:

Protection during/in use:

Read label carefully before use.
If medical advice is needed, have product container or label to hand.
Keep out of reach of children.
Do not breathe spray.
Remove/Take off immediately all contaminated clothing.
WASH HANDS AND EXPOSED SKIN AFTER USE.
WASH OFF SPLASHES (IMMEDIATELY).
WHEN USING DO NOT EAT, DRINK OR SMOKE.

It is good practice to wear gloves when using this product although it is not a requirement.
A minimum interval of 7 days must be observed between applications.

Environmental protection:

Do not apply where rainfall is expected within 6 hours of application.
Risk to non-target insects or other arthropods.
Direct spray away from ponds and other surface water bodies.
Do not empty into drains.
Use appropriate container to avoid environmental contamination.
Do not contaminate water with the product or its container.

Storage and disposal:

To avoid risks to human health and the environment, comply with the instructions for use.
KEEP PRODUCT AWAY FROM CHILDREN AND PETS.
Keep away from food and drink.
KEEP PRODUCT IN ORIGINAL CONTAINER, tightly closed and in a safe place.
Dispose of contents/container to a household recycling centre as hazardous waste except for empty containers which can be disposed of by recycling. Contact your local council for details. PROTECT FROM FROST.
